Sonam Dorji

Software Development Consultant I – Java Backend & Cloud Platform Engineer

Bangalore, India | Sonam.Dorji@lumen.com | +91 8091784778 | linkedin.com/in/SonDorj | github.com/SonDorj

Professional Summary

Java backend engineer with 3+ years delivering distributed, enterprise-scale systems for telecom service-assurance and public-safety (PSAP) platforms. Designs and ships Spring Boot REST APIs, OAuth-secured microservice integrations, and Kafka-based event processing; leads Kubernetes/Rancher and Apigee X cloud migrations to GCP; and owns production incident resolution for platforms supporting 500+ enterprise customers and 1.5M+ service records. Proven record modernizing legacy systems and shipping 100+ production pull requests while preserving business-critical functionality.

Professional Experience

Software Development Consultant I – Java Backend & Cloud Platform Engineer **July 2023 – Present**
Lumen Technologies *Bangalore, India*

- Built and enhanced backend APIs for an AI-assisted incident-management platform's feedback loop, delivering new capabilities that improved structured feedback capture and supported operational workflow optimization.
- Designed and delivered REST APIs and OAuth/Apigee-secured service integrations for an enterprise ticketing and public-safety (PSAP) platform, enabling new ticket-creation workflows and SLA-aware case notifications for mobile and partner clients.
- Diagnosed and resolved high-priority production incidents – including API response-mapping defects, SSL/TLS handshake failures, and SQL pagination issues – restoring correct case data and improving platform reliability during active cloud migrations.
- Led rehosting of service-assurance microservices from legacy Kubernetes to Rancher across 7 environments, and validated GKE/GCP migration readiness, reducing infrastructure risk during platform modernization.
- Re-architected a partner-integration service from synchronous to asynchronous API processing, eliminating Kafka queue-backlog risk and preventing cascading delays when downstream vendor systems degraded.
- Migrated enterprise REST services to Apigee X, including proxy/product onboarding and OAuth/JWT security configuration, advancing API-gateway modernization while preserving backward compatibility for existing integrations.
- Built notification and reporting enhancements supporting 500+ enterprise customers and 1.5M+ service-inventory records, and authored 100+ merged pull requests across enterprise Java microservices.

Key Projects

IncidentAI – AI-Assisted Incident Management – Built backend APIs for the platform's feedback loop, enabling structured feedback capture, workflow optimization, and operational readiness.

Ticketing & GCR Platform Modernization – Delivered REST/OAuth API integrations, InfoArchive/Documentum migration support, and production defect resolution for a core enterprise ticketing and case-management platform.

PSAP Dashboard – Built bulk compliance-update, attachment, and SLA-aware notification workflows for public-safety case management, spanning UI, service, and permission layers.

Partner Integration & Messaging – Redesigned a synchronous partner-integration service into asynchronous, Kafka-resilient processing, and migrated it to OAuth-secured Apigee endpoints without breaking existing contracts.

Cloud & Platform Migration – Led Kubernetes-to-Rancher rehosting, GKE/GCP migration validation, and Datadog observability rollout across multiple enterprise environments.

Technical Skills

Languages: Java, SQL / PL-SQL, JavaScript, Shell

Frameworks, APIs & Data: Spring, Spring Boot, REST APIs (RESTv2/RESTv3), Microservices, EJB, Oracle, SQL Server, Cassandra (DSE)

Cloud & DevOps: Kubernetes, Rancher, GKE, GCP, Docker, Apigee X, CI/CD, GitHub

Integration & Messaging: Kafka (Confluent), OAuth 2.0, JWT, Documentum, InfoArchive

AI & Platform Tooling: AI-Assisted Workflows, Feedback/Metrics Pipelines, Operational Tooling

Monitoring & Practices: Datadog, AppDynamics, Splunk, Production Support, Incident Resolution, System Modernization

Education

Bachelor of Engineering in Computer Science and Engineering **2019–2023**
Visvesvaraya Technological University *CGPA: 8.51/10*
